

Hearing Protection by Gateway Safety. Comfortable, reliable, affordable.

SoundOut® II & SoundDecision® Earmuffs

According to the National Institute for Occupational Safety and Health (NIOSH), noise-induced hearing loss is 100 percent preventable by wearing appropriate hearing protection. Once acquired, however, hearing loss is permanent and irreversible. Gateway Safety's protective earmuffs are affordable hearing protectors that workers won't mind wearing.

The new and improved **SoundOut® II** protective earmuff features one of the highest independently-tested Noise Reduction Ratings in the industry, with a 29 NRR. Its durable design includes large cups with soft cushions for added comfort and an effective seal around the ears.

SoundDecision® economy earmuffs provide a lightweight, traditional style with a mid-level noise reduction rating of 25 NRR. Both styles include a headband that's fully adjustable. Wearers can choose from three positions to obtain a customized, comfortable fit based on their desired wear.

Now you've heard. Earmuff options by Gateway Safety offer verified NRRs, custom comfort and value pricing. That's sound protection.

SoundOut® II

SoundDecision®

SOUNDOUT® II Features

- Excellent attenuation – at 29 NRR, SoundOut II is at the top of its class. Ideal for high-noise environments.
- Durable, dielectric earmuff features soft foam cushions for ensured comfort and a close seal around the ears.
- Fully adjustable - can be worn over the head, behind the head, or under the chin – for a customized fit.
